Summary

I am a Junior Python Developer. I decided to switch from another field, because in the current age of information, web developer is an engineer of the Internet. It is very important to have useful, relevant and marketable knowledge. Had practical experience in application development with Python, Django, design the structure of the database, PostgreSQL, Docker, Vue3, HTML, CSS, JavaScript, Git, Bootstrap, project deployment on the server with Nginx, Unicorn. Aimed to further develop in the direction of learning the Python language and related technologies
